---

Dear Esther,

I really hope you read my email, take it to heart and pass it on to others who are involved in the decision making/law making regarding the safe levels of Glyphosate to allow in our foods.

I am a native Californian, business owner in the Natural Health industry and an active FARMER in the wine industry. I see first hand what glyphosate (and RoundUp) does to, not just weeds, but our soil and our crops- and it depletes ALL of them from vital nutrients and leaves them exposed to disease (and so many other issues). And it does NOT break down like Monsanto claims. We stopped using it 2 years ago and I still see the damage it caused in our soil and current crop as proven in our lab testings and is also very obvious visually! It is NOT a joke!

We need to be VERY careful what we allow to be used on and in our food products and be VERY protective of our health, our environment and the earth for our CHILDREN AND GRAND CHILDREN'S sake.  
YOU must understand. Do you not have family too? How much do you care?

There are other alternatives to weed control (it's called mowing and hoeing) where poisoning our food supply and ourselves is just not necessary! We can't make it too easy for big Ag to use large amounts of glyphosate, as they want- it is too much a great health RISK- and it is just NOT worth the risk of causing ever increasing rates of Autism and Cancer!

PLEASE be part of the greater good of our civilization by saying NO to glyphosate in our food, and not be part of our demise. This issue is VERY serious. Please exercise extreme caution and GOOD judgement.

Thank you. My grand children and their friends will thank you too.
